Simmental • Red Angus | Mercer, North Dakota

a family operation

5th annual
RUST MOUNTAIN VIEW
Queens of the Pasture
production sale
Monday, October 30 :: 1PM cst :: At the Ranch - Mercer, ND

On behalf of all of us at Rust Mountain View Ranch we'd first and foremost like to thank you for your interest in our program and would also like to thank our past buyers. We have been working very hard to develop our females and bulls to meet the needs and expectations of our customers and we feel this sale will be a great representation of our herd.

We have taken great pride in our choices of dams that we will be offering offspring from October 30. We have dedicated many hours, phone calls, miles, and financial resources in finding the great females that we use in our flushing program. Today we offer with great confidence their offspring for your appraisal. Some of those great females are RF Scream 215Z, Beech Bros Yara 122Y, Werner Black Angel 1299, Soo Line Rose 1019, BKT Larkeisa

M288 CK, C-Bar Siera Y27, and NSFR MTX W14 just to list a few. Not only are their offspring offered for sale but their full and half-sisters will be the backbone of our herd in the future.

We are so honored to say we are part of the cattle industry today. Each year there are new challenges and opportunities which makes this industry so exciting and rewarding! There is nothing that is more rewarding than overcoming challenges and seeing the end result of years of hard work come to fruition! This is the case with this year's sale. We have been working diligently each year on our base cow herd and are starting to see more and more of the rewards that an extensive embryo transfer program has to offer. We will be selling females and bulls this year out of embryo heifer calves that we have retained within the herd in past years. There is nothing more exciting than watching those cows evolve into the genetic gems that you imagined and hoped they would be when you first planned the flush! As always it continues to be our utmost passion to bring the greatest cattle possible to our customer base with your needs in mind first and foremost! I believe we have set the bar extremely high this year with all live cattle running through the sale being direct embryo transfer calves except three head, in which of two of them are out of home raised embryo transfer cows! So buy with confidence at this year's sale because these will be the backbone of our program as well for years to come!

Like always if you have any questions about the catalog, our program in general, don't hesitate to give us a call. Or if you're ever in the area we'd love to have a visit and show you around the ranch. The coffee's always on!

Thank you again for your interest in our program!

Sincerely, *the Rust family*

The deepest offering to date...

90% of the offering are embryo transplant calves!

90% of the this year's offering are embryo transfer calves and that shouts opportunity for all progressive cattlemen. Welcome to the Rust Mountain View Ranch Female Sale as this year's offering is extremely deep in quality and cow power. We are all aware of the drought stricken area that has heavily affected the Northwest USA and southern portion of western Canada throughout this summer. The Rust family has wisely decided to cut the sale nearly in half and only offer the very best, the cream of the crop, the cornerstone of their program in this sale offering.

After going through the Rust offering in September, I was mentioning to a breeder that it is the best set of cattle the Rust family has ever offered and 90% of the offering are ET calves. He replied with a valid question "how can they afford to offer their best every year, won't that affect their cow herd?". It was a valid point but after explaining, he understood why they can as they have designed their breeding program to have 2 breeding groups, the Feb/March that is represented in this sale and a summer June/July that is continually growing and those genetics are completely off limits. They annually put in hundreds among hundreds of embryos and with progressive embryo work, they retain all the genetics produced in the summer calving to build their program off of and can afford to showcase their program with the deep set of genetics that are offered in this sale from the Feb/March program. No heifers have been overlooked and they allowed us to select all the best calves, only the cream of the crop are represented in this offering.

The Rust program works extremely hard to source the very best genetics and are diligent to source the very best donors within the industry. They built their herd to offer genetics that are productive and offer strong ROI to their customer base. Their recent success within the show ring is a testament to the quality of cattle they have sourced with recent champions at the largest shows in North America (NAILE, NWSS, Agribition and FarmFair). Whether it is a show ring or production female you seek, the Rust cattle are bred to succeed and produce great calves for years on end.

The 2017 offering have some of the most intriguing pedigrees to be sold in North America this fall. These Feb/March heifers are FRESH and have been coasted along gently with longevity and production value as their first priority. We have confidence you will be impressed with the consistency in the offering and feel this deep set is worth the drive. We hope you can make it to Mercer, ND on October 30 but if not, feel free to contact any of us BMS to utilize our integrity-driven, confidential order buying services. We look forward to visiting with you at Rust Mountain View Ranch on sale day!

Sincerely, *the Bohrson team*

One of the very best females we have ever raised lies within Rust Miss Scream 6105D! Our 2017 sale offering is the most stacked group of quality females to date and Scream 6105D easily rises to the Lot 1 position as we feel she is a potential great one in the making. Her dam, Scream 215Z is one of the highest revenue raising donors in the breed and customers that invest in her genetics have had HUGE ROI on their purchases. RF Scream 215Z was an Agribition Reserve Grand Champion and her progeny have been lighting up the 2016 & 2017 show road and have been dominant in the winner's circle. It truly is hard to part with great females such as Rust Miss Scream 6105D but we have always committed to selling out very best and no animals are off limit when it comes to offering our best. *We are selling 100% of 6105D but we would like to reserve the right to a successful flush with a minimum of 12 embryos at the buyers convenience and our expense.*

Rust Miss Rose 7303E 50% SimAngus Open Female

homo polled /// black /// 3251403 /// 2017-02-09 /// bw-85 /// ww-614

We are incorporating one of the greatest Angus females into the Simmental genetic pool and we couldn't be more excited to showcase the results to all Simmental enthusiasts. Rust Miss Rose 7303E is an impressive female and has worlds of potential ahead of her as a cornerstone female. Her dam, Soo Line Rose 1019 is absolutely flawless and as perfect phenotype female as you will find ANYWHERE! The production in the cow family is historic, 1019 would be a direct daughter of the \$100,000 EA Rose 918 which makes her a maternal sister to the great Bank Note! Once again, commitment to offer only the best is why a female of this quality is being offered!

Rust Miss Sheila 7310E PB Simmental Open Female

polled /// black /// 3251489 /// 2017-03-08 /// bw-80 /// ww-625

This is one we definitely love, just a March 8 female but when the most critical cattlemen have toured this summer and truly analyzed her, she rises to the top of the pen and is a SALE FEATURE! Extremely nice in her make with donor material wrote all over her, she is a daughter of the great LFE Sheila 82A. Sheila 82A was a dominant show female claiming the highest accomplishments on the Canadian show road as Agribition & FarmFair Champion Female along with RBC Top Ten Qualifier! Not everyday do you get to acquire with the genetics and phenotype as Sheila 7310E offers.

We are digging deep by offering the very best in hopes to provide cornerstone females for our customers to successfully build their program off of. Lot 4 is a full sib to the \$32,500 Rust Breakthrough 4031 and out of the great TNT Miss W31 that commanded \$24,500 in a past female sale to Greg Schaefer. We have combined two of the great breeding pieces in the Angus and Simmental sector to create Rust Miss W31 712E and we have confidence she can accomplish similar production results as her great dam.

Rust Miss W31 7232E PB Simmental Open Female

homo polled /// homo black /// 3251492 /// 2017-03-12 /// bw-115 /// ww-651

This is one of the top picks from the Bohrsen team during the summer tours for her soundness, presence, balance and rightfully so! Just a March 12 baby but big time potential in this young but awesome female. W31 never misses and she is widely known for her production of the great Breakthrough bull, but this heifer here standing as Lot 5 may end up being the most dynamic breeding piece she has produced. Once again, a donor quality female in the making and we feel the Broadway combination was the perfect fit!

In the summer of 2015, we toured into Saskatchewan visiting friends and customers and ended up a ways up north in the bush at Muirhead Cattle Co. We came across a flush of theirs that resulted in 6 summer bull calves on grass that were phenomenal, we then bought full sib embryos to them and the result is an awesome trio of heifers in Lots 6-8 along with 4 impressive bull calves for our sale next February. Lot 6, has the style, balance and overall presence to hang a halter on and furthermore, become a front pasture producing female.

The production of Lots 6-8 dam is impressive as she is unreal consistent in raising highly sought after progeny, the 6 full brothers to these heifers sold at Muirhead's this spring and grossed \$61,250! LRX Ms Black 12Z herself was a past \$15,000 Friday Night Lights high seller and we feel these females have big time production value ahead of them. Their sire, Broker 221Z commanded \$85,000 when he sold and was talk of the breed and continues to breed very true.

The final ET heifer of the trio is the performance oriented female. She was the heaviest heifer at weaning and still does it with extreme balance and structural soundness in a high performing package. You will appreciate her natural stoutness and shape being backed by a no-miss, rock-solid pedigree. It will be very interesting to see how the knowledgeable cattleman that attend the sale sort these ET heifers as they are all top quality individuals.

Rust Miss Sadie F226E PB Simmental Open Female

We have been very fortunate to have owned many influential donor females within the breed but TNT Miss Sadie M68 may be the one we hold closest, near and dear to our hearts. She escalated our Simmental division and has the utmost amount of positive influence of any cow on our program and we are forever grateful for her lasting influence. We are proud to offer a direct daughter of the great M68 and the \$67,000 Royal Red in Lot 9. Invest in this female not only for the quality heifer she is today but most importantly, the outstanding producer she will be into the future.

The great Miss Werning KP 8543U donor female needs no introduction as she is currently the most influential Simmental female in the business. In 2016, we purchased a red son of hers in our 79C herd sire, who in turn is a full brother to the high selling Bank Roll that commanded \$205,000 to Double Bar D in the spring of 2017. 79C worked great in our heifer pen and will add calving ease and maternal power to any pedigree. Lot 10 is a prime example of the strength of his production and once again the great M68 shows up on the bottom side of the pedigree!

One of the real cool upcoming females in our program is the dam of Lot 12, J6RA Ms Spyder C710. Sired by Pilgrim and out of a Hamley daughter, she offers current sought after genetics. When we combine the bottom side of pedigree with the likes of the great Loaded Up and 8543U on the top side, a very intriguing female forms in Lot 12 here. She is sound to the ground, stands square and moves like a cat, we feel she has many features to be an excellent individual into the future.

Rust Ms Honey 7209E 75% SimAngus Open Female

homo polled /// red /// 3251478 /// 2017-02-03 /// bw-110 /// ww-706

When it come to shear performance, production value and overall consistency - Red Rocket has been an absolute work horse. It is hard to find a Simmental bull that offers his performance while remaining fluid in his movement and stand on a deep strong foot. We unfortunately lost him during breeding season this summer but his legacy will live on through daughters such as Lot 13. Her dam, T135 is a beautiful donor female and this high performing heifer calf is a testament to her production.

LFE Sheila 82A Simmental Embryo Lot

embryos are stored at Transova, Iowa :: Exportable to Canada

LFE Sheila 82A was acquired from Lewis Farms as one of the high selling females in their 2014 Female Sale. When we teamed up with Mader and Canadian Donors to purchase her, we knew she had the capabilities of accomplishing great things. In the fall of 2015, she went on a dominant show career being named Grand Champion Female at FarmFair and Agribition along with Top 5 at FarmFair Supreme and Top 10 at the Agribition Supreme. Her first calf commanded \$15,000 with embryos seeking \$3,000+. The mating to the \$28,000 Heavy Hitter will enhance performance in an outcross pedigree.

LOT 14A - Choice of 3 or 5 embryos
Sire - LFE Heavy Hitter
Dam - LFE Sheila 82A

Agribition Champion: *LFE Shiela 82A*

\$15,000 daughter: *Centerfold 52C*

TNT Miss W31 Simmental Embryo Lot

embryos are stored at Transova, Iowa

TNT Miss W31 has been an outstanding producer and we have mated her to 3 awesome bulls! We are offering 2 impressive daughters from W31 in Lots 4 & 5 to showcase her production value, and don't forget she is also the dam of the \$32,500 Rust Breakthrough 4043. The sire of Lot 15A, Bullseye 3046A is a son of the famous 8543U and has been a potent breeding piece. Loaded Up needs no introduction as he is one of the great breeding bulls in the breed today and the reports on Stepping Stone have been outstanding, adding value to all that utilize him.

LOT 15A - 3 embryos
Sire - W/C Bullseye 3046A
Dam - TNT Miss W31

LOT 15B - 3 embryos
Sire - W/C Loaded Up
Dam - TNT Miss W31

LOT 15C - 3 embryos
Sire - WS Stepping Stone B44
Dam - TNT Miss W31

Son: *Rust Breakthrough 4031*

Daughter: *Rust Miss 592C*

LOT 16A - 3 embryos

Sire - SVS Captain Morgan
Dam - TNT Miss W168

LOT 16B - 3 embryos

Sire - LFE Commissioner
Dam - TNT Miss W168

Son: *Rust Bull 34D*

Daughter: *Rust Miss 570C*

LOT 17A - 2 embryos

Sire - SVS Captain Morgan
Dam - FSCI Ava B408

LOT 17B - Choice of 3 or 5 embryos

Sire - LFE Commissioner
Dam - FSCI Ava B408

\$60,000 Full Sib: *GVC Blackstar*

\$40,000 Full Sib: *FSCI Maria B407*

TNT Miss W168 Simmental Embryo Lot

embryos are stored at Transova, SD :: Exportable to Canada

In our female sale last year, the W168 daughters were in high demand and heavily sought after. W168 is probably one of our most underrated donors but she is quickly escalating into a very popular donor at the ranch for her sheer ability to produce. Strong feet, excellent udder and fault free profile best describes this outstanding producer and when we combine that with breed leading bulls such as Commissioner and Captain Morgan, a world of opportunity lies ahead.

FSCI Ava B408 Simmental Embryo Lot

embryos are stored at Transova, Iowa :: Exportable to Canada

The Built Right genetics have been in high demand for their outstanding maternal ability and we feel the \$40,000 Ava B408 and her full sister, the \$60,000 Blackstar are among the best daughters to date. Ava B408 checks off all the boxes in becoming a first class cornerstone female with a sound foot, beautiful udder and overall structural soundness. We currently have limited genetics on B408, so jump on the opportunity on October 30 to acquire her lineage.

NSFR MTX W14 Red Angus Embryo Lot

embryos are stored at Transova, Iowa :: Exportable to Canada

W14 is our current go-to Red Angus donor that we are putting a lot of faith in to advance our program based on her sheer ability to produce consistency and quality no matter how she is mated. We feel that she has a lot to offer in terms of strong phenotype with a maternal driven genotype and balanced set of EPD's. This Sakic daughter has some of the very best progeny every year and this year is her best set yet in Lots 29-32. With the genetic matings of Signature and Nexus, we feel that the resulting progeny will be excellent.

Red Soo Line Rhonda 5109 Red Angus Embryo Lot

embryos are stored at Transova, Iowa :: Exportable to Canada

Rhonda 5109 is one of our very best and a true breed leading donor female. A past high seller in the legendary Soo Line Dispersal and proven producer, we feel 5109 offers huge potential in these embryo matings. As good as the donor dam is within this exciting lot, check out the big time herd sires that are represented within the matings. EXCLUSIVE GENETICS - these proven bulls top semen sales with Signature averaging \$600+, Firestorm at \$250+, Reckoning at \$500+ and the past NWSS Champion, Trump off the open market!

LOT 18A - 3 embryos

Sire - Red Six Mile Signature

Full sib to donor: SAV Blackcap May 4136

BKT Larkeisa M288 Red Angus Embryo Lot

embryos are stored at Transova, Iowa :: Exportable to Canada

Not all great donors have the most fancy pictures, some just go out and produce and pay the bills. Note, her picture was taken at 13 years young and shows her longevity with a solid udder. She would rival any donor in our arsenal for fellow breeder acceptance with herd sires in the highly respected SSS Red Angus, Six Mile Ranch and Blairs. Ag programs. She also produced a \$15,000 daughter to Slack and Thomas and \$9,000 daughter to Jeff & Elly Moe. Big time producer and awesome matings are represented in these highly marketable genetics.

SAV Blackcap May 6566 Angus Embryo Lot

embryos are stored at Transova, Iowa :: Exportable to Canada

OFFERING FULL SIB EMBRYOS IN BLOOD TO THE \$750,000 SAV PRESIDENT 6847! When it all shook out at the 2017 SAV Sale, the Charlo x Blackcap May 4136 (full sib to Lot 21A donor) flush grossed in excess to \$2 million dollars. We have dug deep into our arsenal to offer these leading genetics that are sure to be a great investment for the successful buyer.

Rust Miss Sierra F205E Black/Red Carrier Open

black /// 3704679 /// 02-18-2017 /// bw-82 /// ww-644

Digging deep to let these genetics go, we are only offering 2 for sale and the other 2 will be retained in herd to continue on the legacy of C-Bar SieraY27. Originally, we wanted to keep this entire flush but with persistence from the Bohrson team, we gave in and are offering 2 at auction. The Lot 22 female is extremely well balanced and has the highest ADG of the ET heifers, this one has herd bull maker wrote all over her.

The Lot 23 female has the broodiness and overall balance to be selected amongst the 2 out of the 4 on offer as she is fault free in her kind. We are proud to offer new, stacked genetics for the Red Angus gene pool loaded with some of the great females in both the red and black industry in this choice lot. It will be very interesting to see which ones are selected.

open & ready to flush
Located at Yackley Transova in South Dakota

Offering a full sister to the world renowned, Red Six Mile Sakic 832S! What better time to showcase the heart of our herd in this donor as she is flushing very well, leaving us a surplus of embryos and has 4 awesome daughters in Lots 22 - 25 to showcase her potent breeding ability. She has been flushed 4 times (twice in 2016 and twice in 2017) and currently averaging 13+ frozen embryos per flush. The only reason we are selling her is because we have a large embryo inventory and will be retaining 2 of the heifers in the Lot 22-25 choice lot to carry out her legacy. This beautiful udder female is royally bred and has worlds of production ahead of her for the successful buyer!

Rust Miss Countess 7213E Red Angus Open Female

3704709 /// 02-23-2017 /// bw-87 /// ww-670

Red Soo Line Countess 6409 was a high selling female in the legendary Soo Line Dispersal and is now a cornerstone donor for ourselves and the Blairs. Ag crew. She has a proven track record and her mating to the exclusive phenom, Signature has resulted in these 2 excellent females. Lot 27 is the power female of the flush and was one of our heaviest females at weaning, we feel the genetics she carries and the power phenotype she possesses enables her potential to raise big time herd bulls and sought after females in the future.

Rust Miss Countess 7216E Red Angus Open Female

3704707 /// 02-24-2017 /// bw-81 /// ww-574

Lot 28 is really sweet in her type and is sound to the ground in a fault free package. This low birth female carries a very exciting pedigree that will enable her to be a great breeding piece for successful buyer. Signature semen has consistently commanded \$600+ a dose and he is proving to be a dominant breeding bull with widely accepted progeny reports. When combined with the beautiful Countess 6409, we have 2 females here that will be among the very top sale features in the offering.

The marketability is already done as Lot 37 is a maternal sister to herd bulls working at SSS, Blairs.Ag and Six Mile. M288 does it once again! Lot 37 was the heaviest weaning weight female in the Red Angus calves of 2017 and she does it with so much natural dimension and overall power, yet remaining feminine in her type. Longevity is on her side with the long lasting production of M288 and when we combined that with the ever so popular Nexus, it was a great mating. Check out her impressive EPD profile combined with her powerful phenotype that is certain to develop into an easy doing, high income producing female for many, many years to come.

Terms & Conditions

BIDDING AND APPLICABLE LAW: All cattle listed in this offering comply with prevailing sale terms and conditions as set forth by the laws of the state wherein the sale is conducted. There are no warranties, expressed or implied, by either the auctioneer or consignor, except as set forth herein, as to the merchantability of fitness for any particular purpose of any animal offered in this sale. The right to bid or the right to reject the final bid, if done before the hammer falls, is reserved for all sellers unless otherwise announced from the sale block or as prohibited by law in the state wherein the sale is being conducted.

ANNOUNCEMENTS: Any change of information other than in the catalog will be announced from the auction block and such announcements shall take precedence over printed material. All statements made from the auction block or those made by the seller (in private treaty), must be documented by seller if requested by the buyer at time of sale.

TERMS: Terms of sale are cash unless satisfactory credit arrangements have been made with the seller previous to the sale of any animal so affected.

PURCHASER'S RISK: Each animal becomes the property of and therefore is also the risk of the purchaser as soon as it is sold; except it shall be the obligation of the seller to see that animals are fed and cared for free of charge to purchaser, until loaded for shipment or until the expiration of twenty-four (24) hours after the sale, whichever occurs first.

HEALTH REQUIREMENTS: 1. All cattle entered for sale must meet the health regulations of the state in which they are sold. All other agreements regarding the health of the animal will be between the buyer and seller and should be documented in writing.

2. If sale cattle are returned to the seller for an adjustment, they must meet the health requirements of the state they are returned to.

CERTIFICATE OF REGISTRY: Each animal, which is catalogued, offered and sold as a registered animal, shall have a certificate of registry available at time of sale. When an animal is sold as "eligible for registry" or "registry applied for", the seller shall be responsible for obtaining the certificate of registry and for the proper transfer of the certificate to the purchaser including full payment of transfer fees.

IDENTIFICATION: Each animal, at time of sale, must have a readable tattoo or brand corresponding to that shown on the certificate of registration.

AUTHENTICITY OF PEDIGREE: When an animal, through parental validation, is determined to have an ancestry other than that reported on the registration certificate, the buyer shall be entitled to a refund of the purchase price from the seller upon return of the animal to the farm of the seller at the seller's expense. The animal in question, at the buyer's option, may be exchanged for another animal of equal value, or if agreeable with the buyer, the seller may have the certificate returned to the buyer. Any adjustment provided herein, if selected, shall absolve the seller from further liability for authenticity of pedigree to the buyer.

BREEDING GUARANTEES AND DEFINITIONS: 1. Females are guaranteed to be breeders, with the exception of: a) Female calves sold at side of dam b) Injury or disease occurring to the animal after time of sale c) Gross negligence or willful misconduct on the part of the purchaser d) Females used in ovum transplant after time of sale e) Cows sold with calf at side or a female that calve

2. Bulls are guaranteed to be breeders (definition as the ability to settle healthy cows by the time the bull is 18 months of age)

3. Any guarantees with respect to the ability to freeze semen shall be made by separate agreement between buyer and seller.

4. Safe in calf females are females that have been diagnosed pregnant by a competent veterinarian, and are pregnant at time of sale.

5. A bred female is a female known to have been served by a bull either by natural breeding or artificial insemination, but it does not necessarily mean that the female is safe in calf to that service.

6. A pasture-bred female is a female that has been pastured with a designated bull and has been exposed for the time stated, but it does not necessarily mean that this female is safe in calf to that bull.

7. An open female is a non-pregnant animal. 8. Calves sold off their dams (split pairs) shall carry the full breeding guarantee. **PRIVILEGE OF PURCHASER**

TO EXAMINE: The purchaser of a female animal may have her examined within twenty-four (24) hours after the fall of the hammer and prior to removal from sale premises. The pregnancy status of breeding status of a female so examined, when found not to be as represented at the time of sale, is cause for the female to be returned to the seller as unsold. **EMBRYO TRANSFER:** 1. Sellers should provide upon request a complete history of embryo transfer activity for any female offered for sale. 2. Withholding information on the existence of frozen embryos at the time of sale would be considered an unethical practice.

OPTIONS AND PRIVILEGES OF RETURN OR ADJUSTMENT: The following adjustments do not preclude the right of the buyer and seller to mutually agree upon other terms and conditions for settlement of any dispute. 1. All claims for adjustment or refund must be made in writing either six (6) months from the date of sale or no later than when the animal reaches 24 months of age whichever occurs later, with the exception of claims involving misrepresentation of service sire or as otherwise provided herein.

2. In the event an animal is claimed to be a non-breeder, the animal may be returned to the farm of the seller, at the buyer's expense, if in good physical condition, and the return is in compliance with the health requirements of the seller's state. The seller shall be entitled to a six (6) month trial period following the return of the animal in which to prove the animal is a breeder. If at the end of six (6) months the seller is unable to prove the animal is a breeder, the seller shall, at the option of buyer, replace the animal with another equal value or refund the purchase price. Either option shall be deemed full satisfaction and settlement.

3. If a female is sold as "safe in calf" to a given sire or sires on a specified date or dates and proves not to be as represented, the buyer is entitled to a refund of the purchase price from the seller upon return of the animal and resulting progeny thereof to the farm of the seller at the seller's expense.

4. If a female is sold as "open" and proves to be with calf at time of sale and examined pregnant within sixty (60) days after sale, the buyer may return the animal to the farm of the seller prior to calving for a refund of the full purchase price or for another animal of equal value, whichever acceptable to the buyer. It shall be the obligation of the seller to bear any expenses incurred for transportation of the animal in question to the farm of the seller. **GENETIC TESTING AND TRAITTRAC STATUS:** Sellers must identify the TraitTrac status and the results of any qualitative genetic testing performed on any animals or genetic material offered for sale. The ASA considers it an unethical practice to misrepresent or fail to disclose the TraitTrac status or qualitative genetic test results of any animal or genetic material.

DISCLOSURE OF MATERIAL INFORMATION: Sellers must disclose all material information concerning any animal or genetic material offered for sale. For the purposes of these Sale Terms and Conditions, "Material Information" is defined as any information which would be likely to affect the value of the animal or genetic material if the information were known to the public. Material Information includes, but is not limited to, information related to genetic tests, blood tests, ultrasound pregnancy results, disease tests, pregnancy and fertility test results, information related to the sex and age of in utero calves or embryos, and information related to the fertilization status of in utero calves, including whether the calf was conceived via artificial insemination or natural service. The ASA considers it an unethical practice to misrepresent or fail to disclose any Material Information concerning an animal or genetic material offered for sale.

LIMITATIONS OF OBLIGATIONS: These sale terms and conditions constitute a binding legal obligation between the buyer and seller of any animal or genetic material sold under these terms and conditions. However, the ASA, its directors, officers, employees and agents do not assume any obligation, legal or otherwise, to enforce the sale terms and conditions agreed to between buyer and seller.

Rust Miss Angel 7304E Angus Open Female

3251405 /// 2017-02-13 /// bw-65 /// ww-567

There is just that odd cow that you are fortunate enough to come by that just really does nothing wrong. Lots 38's dam, Werner Black Angel 1299 has been mated Angus, Red Angus & Simmental and it has always flat out worked ... every time! Many daughters and sons of 1299 have topped our sale in years past plus at Brooking where they had a \$30,000 high seller last year, we can't say enough good about her potent breeding ability. Bank Note is a breeding legend in the making, no more needs to be said other than he flat out works and when you combine 2 breeding sensations in the likes of 1299 & Bank Note, this Lot 38 female is sure to be a revenue maker.

39

Rust Madame Pride 777E Angus Open Female

3251522 /// 2017-01-13 /// bw-78 /// ww-716

We acquired the dam of Lot 39 last fall as her double bred Madame Pride pedigree intrigued us immensely. Her proven track record increased our confidence in her ability to produce as she has already produced a \$25,500 daughter in Janssen Madame Pride 4514. We feel Lot 39, Rust Madame Pride 777E has all the high qualities that her cow family possesses. When you combine the likes of Seedstock and the great 4136 on the top side, we feel there is a great future in this exciting female.
